PROFESSIONAL SUMMARY

Computer Science graduate and Flutter Developer with 2+ years of hands-on experience building scalable, production-ready mobile applications using Flutter, Firebase, Supabase, and REST APIs. Experienced in developing and publishing mobile applications on the Google Play Store, with expertise in clean architecture, responsive UI/UX, GetX state management, API integration, and Agile Scrum collaboration. Published multiple apps and co-authored an IEEE paper on an IoT-based smart parking system.

PROFESSIONAL EXPERIENCE

Flutter Developer Intern — Omega Soft BD *Apr 2025 – Sep 2025*

Agargaon, Dhaka, Bangladesh (Remote)

- Contributed to the development of an ERP-based Sales Pilot mobile application using Flutter, integrating REST APIs and SQLite for data management and authentication while following clean architecture practices.

SKILLS

Programming Languages

- Dart
- C
- Python
- C++
- Java

Frameworks

- Flutter
- Tkinter
- Java Swing

Technical Skills

- Flutter
- Firebase (Auth, Firestore, FCM)
- App Testing & Debugging
- State Management (GetX)
- CRUD Operations
- Google Maps API Integration
- GitHub & Version Control
- Database & Storage Management
- REST API Integration
- SQLite & Local Storage
- App Lifecycle Management
- CI/CD Pipeline
- Agile (Scrum)

Web:

- HTML
- CSS
- Tailwind CSS

Soft Skills

- Leadership
- Team Management
- Time Management
- Problem Solving
- Critical Thinking

EDUCATION

B.Sc. in Computer Science and Engineering — Daffodil International University *2022 – 2026*

CGPA: 3.32 / 4.00

HSC, Science — Rajbari Govt. College *2020*

GPA: 4.58 / 5.00, Dhaka Board

SSC, Science — Rajbari Govt. High School *2018*

GPA: 4.17 / 5.00, Dhaka Board

PUBLICATIONS

SmartPark: A Real-Time IoT-Powered Parking Navigation, Slot Tracking & Automated Assistance — 2026 IEEE QPAIN Conference. IoT-based smart parking system (ESP32, IR sensors) with a Flutter app for real-time slot detection, booking, and automated gate control.

Paper Link

CERTIFICATIONS & ACHIEVEMENTS

- App Development with Flutter — OSTAD (7-month program): Dart, Firebase, REST API integration, Google Maps; built E-Commerce, Task Manager, and CRUD apps.

Certificates Link

PROJECTS

Medical Help Rajbari — Google Play Store *Jan 2026*

Tech Stack: Flutter, Dart, Getx, Shared Preferences, Firebase Firestore, Firebase FCM

- Developed a healthcare-focused mobile application using Flutter and Firebase, providing doctor, ambulance, health product, and medical service information.
- Integrated Firebase Firestore, FCM Push Notifications, and WhatsApp messaging to support real-time data management and user communication.
- Published the application on the Google Play Store and managed production deployment and release updates.

MusicZone — Google Play Store *Apr 2026*

Tech Stack: Flutter, Dart, Getx, Shared Preferences, Audio Service, Permission Handler

- Developed an offline music player application using Flutter with a clean and responsive user interface.
- Implemented local music playback, playlist management, audio controls, and background music functionality.
- Published the application on the Google Play Store and managed production release and deployment.

SalesPilot — ERP-Based Sales Management App

Tech Stack: Flutter, Dart, GetX , REST API, SQLite, Flutter Map, Geolocator.

- Developed an ERP-based sales management application with order management, customer management, sales tracking, and daily target monitoring.
- Implemented REST API integration and SQLite for data management, local storage, and offline data handling.
- ntegrated Flutter Map and Geolocator for location-based features and implemented sales, payment, commission, and daily target calculations.

MeetDoc — Smart Doctor Appointment & Telemedicine App

Tech Stack: Flutter, Dart, Getx, Firebase Firestore, Firebase Storage, Firebase FCM, ZegoCloud, Gemini API.

- Developed a telemedicine application using Flutter, Firebase, ZegoCloud, and Gemini API for doctor appointments and remote healthcare services.
- Implemented doctor search, appointment booking, real-time messaging, voice/video calling, and secure payment integration.
- Collaborated with a team to design and develop the application with a focus on responsive UI, real-time communication, and user experience.

SociaLive — Social Media App (Team of 4)

Tech Stack: Flutter, Dart, Getx, Supabase, Supabase Auth, Jira.

- Developed a social media application using Flutter and Supabase with a team of 4 members.
- Implemented user profiles, post creation, social interactions, and real-time data management.
- Contributed to UI development, backend integration, API handling, and overall application functionality.

Weatherly — Flutter Weather App

Tech Stack: Flutter, Dart, OpenWeather API, Geolocator, Flutter Map, LatLong.

- Developed a weather application using Flutter and OpenWeather API to provide real-time weather information.
- Integrated Geolocator to detect the user's location and display location-based weather data.
- Implemented interactive map features using flutter_map and latlong2 with a responsive and user-friendly interface.
